

Mobile Talker™

Simple easy to use technology for people with impaired speech

Designed for the non-verbal user who needs to communicate in every day situations.

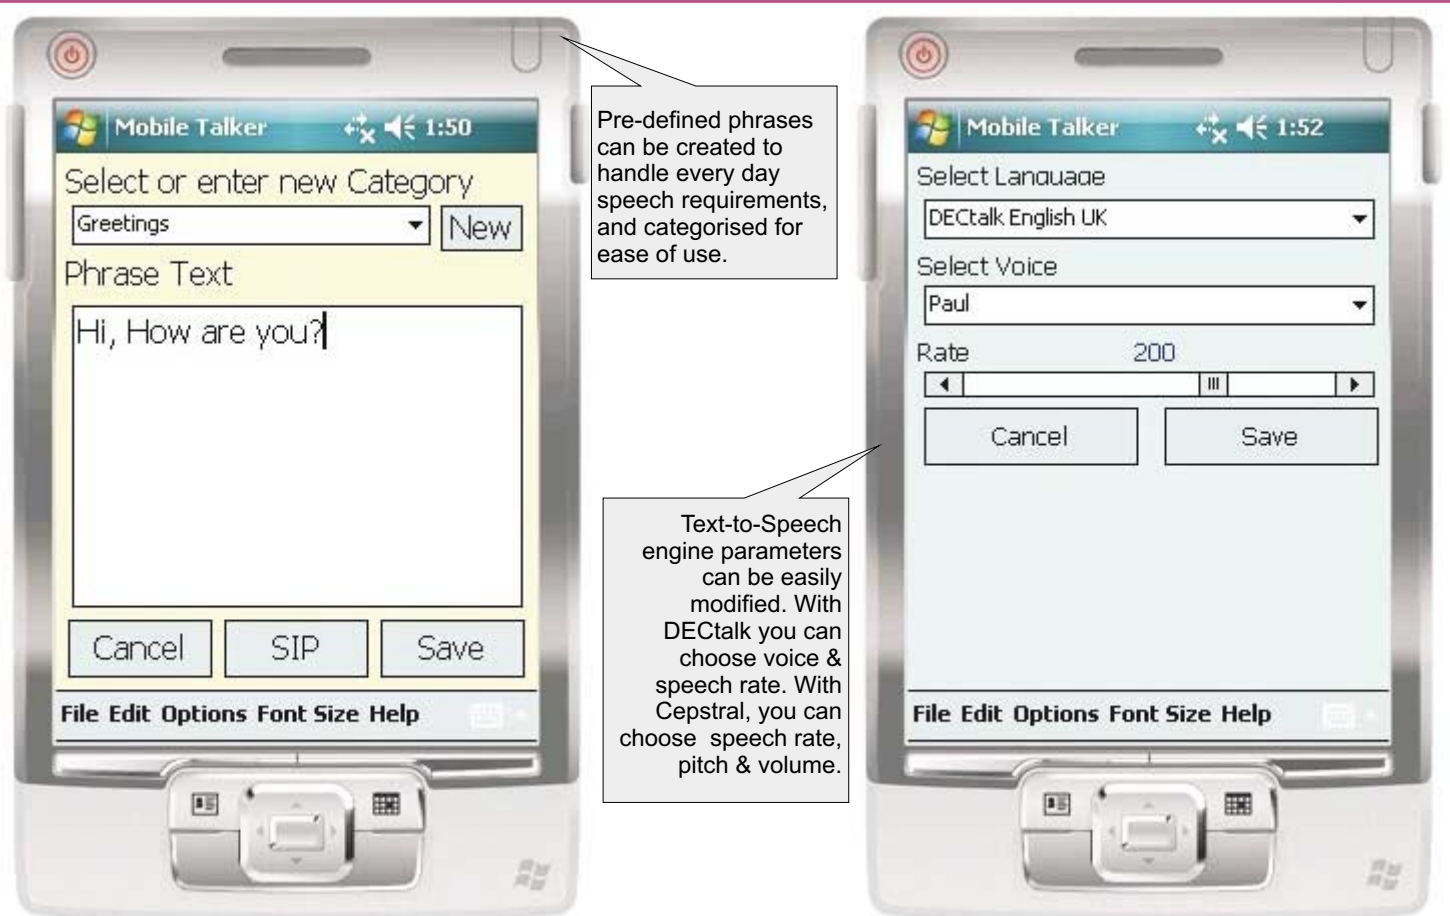

Two modes of operation: **Type + Speak Mode** and **Pre-defined Phrases Mode**

- * **Type + Speak** Mode lets you type in anything and say it immediately.
- * **Pre-defined Phrases** Mode lets you speak phrases that have been created previously and stored under category headings.
- * Text can be input using any method available with the Pocket PC. e.g. Mini soft input panel (SIP), Full screen soft input panel, Handwriting recognition, Thumb-pad, Foldaway keyboard etc.
- * Available for use with a range of Text-to-Speech engines in many languages.
- * Clipboard support enables other programs to speak using Mobile Talker Text-to-Speech Engine.
- * Runs on any Pocket PC or Mobile Phone Pocket PC using Windows Mobile 5 or 6.
- * Designed and supported by qualified member of the Royal College of Speech and Language Therapists.

Mobile Talker runs on any Microsoft Windows Powered Pocket PC
